- Scaling Up Successful Models
- Service Delivery
- Surveillance Data & Strategic Information
- Training and Exchange
- Tuberculosis
- Workforce Development
- Youth Blood Donor Programs
- Youth Health Education

A Team with Proven Global Health Technical and Management Skills

CAMRIS International, a Prime Contractor with more than 50 Years of Experience.

CAMRIS International transforms health services, systems and programs to improve the quality and availability of health services worldwide. CAMRIS has executed more than 1,300 projects and programs for more than 300 clients in nearly 50 countries in all regions of the world. Our experience spans more than 50 years, including over 40 years of continuous service to USAID and its predecessor, the Alliance for Progress, with projects ranging from small evaluation assignments, to complex bilateral health services projects and indefinite quantity contracts. Our core focus is in global health, particularly in health systems organization and management, health finance, health governance and policy, basic services, infectious diseases, performance assessment, monitoring and evaluation, and the implementation of eHealth services.

Global Flu Consortium (GFC) provides a complete range of services to prepare and respond to global flu pandemics, including avian flu.

International Youth Foundation (IYF) seeks to expand outreach to youth through a continuum of services in prevention, care, and support, and to scale up already proven “best practice” programs in HIV/AIDS prevention in a number of Sub-Saharan African countries. IYF’s health programs also include skills-based peer education, life skills, sustainable livelihoods, and advocacy against stigma.

The Population, Health, and Nutrition Technical Assistance and Support Contract, TASC3: Global Health is a worldwide mechanism that allows USAID Missions and Bureaus to easily access high quality technical assistance and support to implement Strategic Objectives that contribute to the Agency’s goal to improve global health in the areas of population, health, nutrition and infectious diseases.

JHPIEGO, an affiliate of Johns Hopkins University, is a leader in increasing access and reducing barriers to high quality health care services through human resource capacity development. JHPIEGO enhances the skills of health care professionals and community providers through direct training and/or strengthening of learning systems, deployment of human resources, performance management focused on the application of standards-based quality improvement processes, and advancement of health care delivery systems. JHPIEGO's expertise encompasses work in policy advocacy, planning, accreditation and quality assurance, human resource administration, and outcomes/outputs monitoring. Core technical areas include, but are not limited to, family planning/reproductive health, maternal and neonatal health (MNH), HIV/AIDS and infectious diseases.

ITG Associates, Inc. (ITG) provides expertise in MCH, CHS, nutrition, infectious diseases, HIV/AIDS, health policy, conflict management and health, and health system reform.

Medical Missions for Children (MMC) is dedicated to improving the health of children and adults in underserved communities around the world. MMC runs a communications infrastructure, the Global Telemedicine and Teaching Network (GTTN), which connects medical specialists from the United States with attending physicians and their patients in developing countries through a video-based global telemedicine system. The GTTN reaches millions of physicians and nurses, and thousands of hospitals and major universities.

National Alliance of State and Territorial AIDS Directors (NASTAD) increases the capacity of resource-constrained countries to plan, implement and manage HIV prevention and care activities. NASTAD provides peer-based technical assistance in monitoring and evaluation, community mobilization, evidence-based decision making, strategic planning, health policy reform, program management, and surveillance.

Public Health Institute (PHI) known for its strong innovations, brings an extensive body of knowledge and experience to the work being done internationally in: reproductive health, chronic and infectious diseases, youth leadership, population and the environment, HIV/AIDS prevention, and research.

Safe Blood International Foundation (Safe Blood) is dedicated to ensuring a safe blood supply through youth blood donor programs, behavior modification, blood donor recruitment, pre and post donation counseling training, laboratory quality assurance programs, and blood utilization training.

Tulane University's Payson Center for International Development and Technology Transfer is one of the world's leading centers of development and capacity building in the areas of infectious diseases, surveillance, epidemiology, nutrition, food security, health information systems, and evidence based public health.

University of the Pacific (UOP) School of International Studies (SIS) brings expertise in HIV/AIDS, infectious diseases, pharmaceuticals, food security, gender, and research.

University Research Co. (URC) is recognized for its capabilities in health systems strengthening, quality assurance, and workforce development. Internationally, URC improves the effectiveness and efficiency of health and population programs. URC services include results-oriented project management and innovative strategies for health and population program design, implementation, and evaluation.

West African Health Organization (WAHO) is an international organization representing the public health sectors in thirteen West African countries. WAHO strengthens programs in the region through capacity building, information, promoting cooperation, coordination and advocacy, and harnessing information technology to improve health outcomes.

World Learning for International Development (WLID) has extensive experience in grants management, capacity building, and training and exchange programs.

CAMRIS International is a Certified:

- Small Disadvantaged Business (SDB)
- 8(a) Program Participant
- Service Disabled Veteran Owned Business (SDVOB)

ADVANCING SOLUTIONS, CONNECTING OPPORTUNITIES, BUILDING A BETTER WORLD

Our Approach: Grounded In Local Realities

As the prime contractor, CAMRIS International will ensure a seamless blending of partner capabilities to effectively execute task orders in a quality, responsive, and cost-effective manner. Our approach to IQC management is geared to be responsive to USAID and host country needs, and is centered on:

- Rapid response that ensures prompt mobilization of technical resources
- Forging collaborative partnerships, working with clients and host country counterparts to design locally relevant solutions
- Identifying and scaling-up best practices to improve services and systems
- Managing resources to build and sustain local capacity
- Introducing innovative technologies to enhance program outcomes
- Integrating program elements that link relevant sectors for impact and uptake
- Flexibility to explore alternate options
- Monitoring, assessing, and disseminating program results and lessons learned
- Complementing existing efforts, including those of USAID and other donor agencies
